PROFESSIONAL SUMMARY

Data Analytics and BI professional with hands-on experience in SQL, Python, Pandas, Tableau, Excel, and business reporting. Strong at cleaning data, writing SQL queries, building dashboards, validating results, and translating analysis into clear recommendations. Portfolio experience includes customer churn analytics, revenue-risk analysis, supply chain delay analysis, Netflix content analytics, SQL database reporting, regression analysis, and KPI storytelling.

CORE SKILLS

SQL & Databases: SQL Server, MySQL, joins, aggregations, CTEs, window functions, views, database design

Python Analytics: Python, Pandas, NumPy, data cleaning, feature engineering, automation basics, Jupyter Notebook

Visualization & BI: Tableau dashboards, Power BI, Excel, Google Sheets, charts, KPI reporting, executive presentations

Business Analytics: Churn analysis, revenue-risk modeling, customer segmentation, supply chain analytics, regression, QA validation

Tools: Git/GitHub, SQL Server Management Studio, Visual Studio, PowerPoint, Salesforce CRM concepts, AWS basics

PROFESSIONAL EXPERIENCE

Data Analytics Trainee | Springboard | Feb 2026 - Present

- Build SQL and Python/Pandas analyses to clean, transform, validate, and summarize data for business reporting and decision-making.
- Develop Tableau dashboards and visual stories that translate KPIs, trends, and operational findings into stakeholder recommendations.
- Create repeatable workflows, documentation, and QA checks to improve accuracy, consistency, and reuse of analytical outputs.

Python Developer | Ravi Info Com, Ahmedabad, Gujarat | June 2022

- Built Python back-end functionality using REST APIs, data handling logic, debugging, testing, and technical documentation.
- Collaborated with front-end developers and business users to clarify requirements, troubleshoot issues, and deliver practical technical solutions.

SELECTED DATA ANALYTICS PROJECTS

Customer Churn Analytics, Revenue Risk & Retention Optimization | Python, Pandas, SQL Server, Tableau, ML

- Analyzed 7,032 telecom customers and identified 26.58% churn with approximately \$1.67M in annual revenue at risk.
- Created churn probability, revenue-at-risk, tenure, and risk-segment features; built SQL queries, Tableau dashboard, and executive recommendations.

Supply Chain Delivery Delay Analysis | Python, SQL, Tableau

- Analyzed delivery delays, shipping risk, operational trends, and profit impact to identify improvement opportunities in supply chain performance.

Student Course Registration SQL Analytics Project | SQL Server, SSMS, GitHub

- Designed relational tables with primary keys and foreign keys; wrote business queries and views to analyze enrollment, capacity, department demand, instructor workload, and student credit load.

Netflix Content Analytics Dashboard | Python, SQL Server, Tableau

- Cleaned and transformed Netflix data; used CTEs, window functions, ranking, aggregations, and Tableau visuals to analyze content trends by type, country, rating, genre, and release year.

EDUCATION

M.S. in Computer Science | Governors State University, Chicago, IL | Graduated 2025

Relevant coursework: Advanced Data Concepts, Java, Fundamentals of Computer Science

B.E. in Information Technology | Apollo Institute of Engineering and Technology, India | Graduated 2022

Relevant coursework: Data Structures, Algorithms, Computer Networks, Computer Vision
